2. The following is an examiner's statement of reasons for allowance: The prior art fails to teach the limitations as recited in claim 15. Specifically, the prior art fails to teach adjusting the ratio between the first and second flow rates for each new pipe section to be cleaned to steer the gas and abrasive particle mixture in a predetermined direction along the selected pipe section.

Applicant has amended claim 15 in independent form, incorporating the subject matter of claim 1. All other claims are dependent on claim 15. In an interview with Ms. Kathleen Proctor, on 1/3/2006, the examiner suggested amending the claims further in order to correct 112, second paragraph issues. Authorization to amend the claims by Examiner's Amendment was granted.
